

Cameron Village Homeowners Association Replacement Front Storm Door Standard

The Architectural Committee of the Cameron Village Homeowners Association has developed and defined a standard for front storm doors for units located within the Cameron Village Condominiums neighborhood. The goal of this standard is to improve the aesthetic look of individual units while enhancing the overall appearance of the property and improving the ultimate value of the individual units and the property.

There are three options available for those homeowners who desire to replace their unit's front storm door:

- (1) A traditional white wood frame & six-panel clear glass door that is a consistent match for those found already in place throughout the property.
- (2) Pella, Ashford Model #4601, white frame, with brass hardware recommended. (Available at Lowe's)
- (3) Larson, Stratford Model #349-04, white frame, with brass hardware recommended. (Available at Lowe's)
- (4) Benchmark by Therma-Tru 36"W 6-Panel Smooth Fiberglass Door Right Hand Item #: 228473 | Model #: BMTTSFG1130RBM (Available at Lowe's)

Remember to submit an Architectural Modification Request Form prior to initiating the replacement of your unit's front storm door.

Please contact Anna Claire Murnick, Property Manager, 919-821-1350, with any questions about this.
